No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Publication No. US20030166846A1
GENERAL INFORMATION:
APPLICANT: PROTEIN SPECIALITES LTD.
APPLICANT: HSC RESEARCH AND DEVELOPMENT LIMITED PARTNERSHIP
TITLE OF INVENTION: SELF-ALIGNING PREPTIDES MODELED ON HUMAN ELASTIN AND
TITLE OF INVENTION: OTHER FIBROUS PROTEINS
FILE REFERENCE: 041082/012
CURRENT APPLICATION NUMBER: US/09/964,662
CURRENT FILING DATE: 2003-05-08
PRIOR APPLICATION NUMBER: 09/340,736
PRIOR FILING DATE: 1999-06-29
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps

GENERAL INFORMATION:
APPLICANT: CARGILL, Michele
APPLICANT: CARGILL, Michele
APPLICANT: CARGILL, Michele
APPLICANT: HURNG, Hongjin
TITLE OF INVENTION: LIVER FIBROSIS IN HERAITIIS C VIRUS-INFECTED SUBJECTS,
TITLE OF INVENTION: MATHODS OF DETECTION AND USES THEREOF
FILE REFERENCE: CL001469
CURRENT PFLICATION NUMBER: US/60/487,610
CURRENT PFLICANTON NUMBER: 260/307-17
NUMBER OF SEQ ID NOS: 97101
SOFTWARE: FascESQ for Windows Version 4.0
SEQ ID NO 1797
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     442
